**Time-based Portfolios**

With so many alternatives available today, choosing investments can be an overwhelming task. That's why we offer target retirement date portfolios, a convenient way to benefit from expert asset allocation and investment selection.

Mutual GlidePath<sup>SM</sup> is a series of time-based portfolios designed to help investors achieve a broadly diversified

portfolio that will gradually become more conservative in its allocation as the target retirement date nears. The portfolios continue to be allocated along their investment "glidepaths" for twenty years beyond the target date to continue generating investment returns well into retirement. Refer to your plan's investment information for more detail about the Mutual GlidePath<sup>SM</sup> portfolios and other investment options.
